

# ASEPT.1X

24/7 Automated Pathogen Protection

The ASEPT.1X tackles the impossible by automatically and safely disinfecting the most contaminated & problematic areas of a medical facility that may contribute to HAIs.

Completely automated with features such as safety door switches and infra-red motion detectors, the ASEPT.1X will only operate in an unoccupied room basking high-touch areas with high-intensity UV-C germicidal light achieving up to a 6 log reduction on contaminants such as MRSA, C. difficile & VRE.

- No-Touch Disinfection solution for unoccupied bathrooms
- Easily mounts to the wall
- Irradiate all high-touch areas with high-intensity UVC germicidal light
- Help reduce HAIs by eliminating pathogens such as MRSA, C.diff & VRE
- Guarantees a safe 5 minute disinfection cycle following each bathroom visit
